Programme

09:00 - 09:45	Welcome, Introduction and goals of the workshop
09:45 - 11:00	Best practices presentations (1)
11:00 - 11:30	Coffee break
11:30 - 12:45	Best practices presentations (2)
12:45 - 14:00	Lunch
14:00 - 15:15	Open discussion 1 Perspectives of using international standards for exchanging student data: consequences for current projects, new opportunities
15:15 - 15:45	Coffee break
15:45 - 16:30	Open discussion 2 Steps toward an international standard for exchanging student data: requirements, constraints, approaches and dissemination
16:30 - 17:00	Conclusion and next steps

 **unisolution**

Open discussion 1

**Perspectives of using international standards for
exchanging student data: consequences for current
projects, new opportunities**

Moderation: Vittorio Ravaioli, Kion - Manuel Dietz, unisolution

European workshop

Defining electronic standards and procedures for the exchange of student
curriculum data between Higher Education Institutions

Rome, 9th November 2007

Open discussion 1

What are you expecting from international standards for student curriculum data in your project, institution, country, etc.?

Are the universities really ready / interested in implementing standard?

How are you considering the current European initiatives (Europass, Ploteus, CEN) or of the other countries (e.g. USA) in your reflections regarding standards?

What will be the problems/consequences for you to implement new standards (if already using others)?

Open discussion 2

What is the best organisation framework for the definition of a standard/specification?

- involved actors: institutions, software houses ...?
- relation / cooperation with EU, CEN, EUNIS, EAIE or any other organisation?
- How not to multiply work in parallel working teams?

How to define the standard

- timing
- technical constraints
- country-specific constraints

How to disseminate / diffuse the standard ?

- Key persons for implementation at each Institution: CIO, IT Dept., International Office Software House?
- convince the universities to make this project a priority?
- changes in the technologies
- changes in the organisation
